

# ARCHAEOLOGY RESEARCH PROGRAM: HUMAN-ENVIRONMENT RELATIONSHIPS

CROW CANYON  
ARCHAEOLOGICAL CENTER

SEPTEMBER 8-14, 2024  
SEPTEMBER 22 - 28, 2024

Join an important research opportunity as a citizen scientist to help advance understanding of human-environment relationships in the Mesa Verde region of Southwest Colorado.

For this unique program, we've brought together more than a dozen scholars and educators in Indigenous and Western archaeology to guide us through inquiry, learning, and discussion about how Ancestral Pueblo peoples forged relationships with the environment through time.

Together we'll contemplate themes like water management, sustainable agriculture, and migration as we learn from Indigenous perspectives, engage in hands-on research methods, and visit area landscapes with respect.

## PROGRAM HIGHLIGHTS

- Your participation in this program directly contributes to furthering research of the Northern Chaco Outliers Project.
- Experience one of the most archaeological-rich locations in the U.S.
- Enjoy the rural comfort of campus life on 170-acres complete with nature trails, stunning views, rocking chairs, and a night sky full of constellations.
- Visit our website to learn about the outstanding team of scholars and educators who will serve as our guides.

## PLAN YOUR TRIP!

Register online at  
[crowcanyon.org/archaeology-research-program](https://crowcanyon.org/archaeology-research-program)
